NOTIFICATION of Quality System Audit No. 40-11536/S of 2019-08-30		

II. Objectives, method and scope of the quality system audit

The audit objective has been to ascertain whether the Manufacturer takes all actions necessary to assure that the production process including the final inspection, tests of finished product before shipment and the method of placing the products on the market ensures conformity of the appliances with the type described in the EU/EC type-examination certificate and with the essential requirements of the Regulation (EU) 2016/426 and Government Regulation 25/2003 Coll. (Directive 92/42/EEC), and whether the Manufacturer duly fulfills its obligations arising out of the approved quality system.

The Notified Body has carried out the audit of the production quality assurance system pursuant to Annex III, Point 3, Regulation (EU) 2016/426 and Annex III, Point 2 – MODULE D, Government Regulation 25/2003 Coll. (Annex IV, module D, Directive 92/42/EEC), at the manufacturing plant: AIC S.A., ul. Tczewska 22, 83-000 Pruszcz Gdański, Poland

Person who performed the quality system audit:

The notified body employee who has carried out surveillance of the approved quality system: Bc. Jan Hnilica

III. Maintenance and application of quality system – Results of surveillance

- Annex III, Point 3., Module D, Regulation (EU) 2016/426 and Annex III, Point 2 – MODULE D, Government Regulation 25/2003 Coll. (Annex IV, module D, Directive 92/42/EEC).

*) Explanation for evaluation:

- C** – conformity (documentation is complete and satisfactory)
NC – nonconformity (documentation is incomplete and/or unsatisfactory)
O – omission (deviation), remove within the set deadline and no later than the next surveillance

If a nonconformity (NC) is detected, a Nonconformity / Nonconformities Record must be issued.

The system is evaluated as satisfactory if no requirement has been classified as „NC“ and if the occurrence of requirements classified as „O“ is less than 20% of all responses.

Notice:

Audit evidence is based on sampling of available information. Therefore, there is an element of uncertainty in the assessment and those acting on the conclusions of the assessment should be aware of this uncertainty. The long-distance audit may further deepen the uncertainty of sampling.

Evaluation:

Initial records from the audit are set out in Check-list no. 40-13285 of 2025-07-18.

All the regulations, documentation and requirements adopted by the manufacturer are documented in a systematic and orderly manner in the form of written policies, procedures and instructions. The quality system documentation shall permit a consistent interpretation of the quality programs, plans, manuals and records.

IV. Conclusion

The Notified Body has performed regular audit on the approved quality system. The quality system **satisfies** the requirements laid down in Regulation (EU) 2016/426, Annex III, Point 3 (MODULE D) and Annex III, Point 2 (MODULE D), Government Regulation 25/2003 Coll. (Annex IV, module D, Directive 92/42/EEC).

The Manufacturer shall affix to each appliance the conformity mark completed with the identification number of the Notified Body responsible for EU surveillance and last 2 digits (XX) of the year in which the CE marking was affixed:

The Manufacturer shall keep informed the Notified Body, which has approved the quality system, of any updating of the quality system relating to changes induced, for instance, by new technologies and quality concepts.

At least once in two years, the Notified Body performs an EU surveillance to make sure that the Manufacturer maintains and operates the approved system of quality. In addition, the Notified Body may pay unexpected visits to the Manufacturer.
